POS-partner[®] 7.1 Upgrade

Version 1.0
September 30, 2009

Overview

TSYS Acquiring Solutions® POS-partner version 7.1, released in September 2009, includes the following updates:

Enhancement	Description
Application timeout	Functionality has been added that will cause the software to shutdown after 15 minutes of inactivity.
Encryption Key Regenerator	Database encryption keys are now required to change every year. As a result, you will be prompted re-encrypt the database by running the Encryption Key Regenerator one year after installation of the program.

Table 1 POS-partner 7.1 enhancements

In addition to the enhancements mentioned above, TSYS Acquiring Solutions has implemented some additional security enhancements and procedures to assist in protecting your cardholder data.

Compatibility

POS-partner version 7.1 is compatible with Microsoft® 2000 and XP operating systems. To be eligible to install this upgrade, merchants must be using POS-partner versions 6.2.13 or 7.0.9.
